LETTER FROM THE BOARD CHAIR

The ABPM is pleased to present the inaugural edition of its Annual Report. Conceived as a way to document ABPM's activities and achievements each year, we are also excited to offer updates on the important projects we're working on.

Over the past several years, ABPM has grown beyond its focus on the three traditional preventive medicine fields, to encompass a broad and diverse group of specialties and subspecialties essential for modern medical practice. The number of Diplomates has multiplied with the addition of the subspecialties of Clinical Informatics in 2014 and Addiction Medicine in 2018, moving the ABPM from a small to a medium-sized board in comparison to other ABMS member boards. This increase in Diplomates necessitated an expansion of both the Board and its staff. Accordingly, we've created and filled new Board positions including Public Member, At-Large Specialty Member, and At-Large Subspecialty Member.

The Board's processes and procedures have become more streamlined, allowing us to pursue new initiatives guided by our five-year strategic plans. For example, ABPM is currently pursuing a multi-faceted Preventive Medicine awareness campaign, and ABPM's newly

created Diversity, Equity, and Inclusion Task Force has already made progress toward ensuring our processes and policies are equitable and fair.

While we're excited about ABPM's new initiatives, the heart of our mission remains: offering effective certification and continuing certification programs. You'll see updates on both our initial certification program and our new Continuing Certification Program (CCP) in this report. Of particular interest is the work done in 2022 on our CCP, culminating in the launch of Phase One of the program on January 1, 2023.

ABPM's work would not be possible without the efforts of an army of volunteers, including the members of the Board of Directors, item writers for both the initial certification exam and the Longitudinal Assessment Program (LAP), certification application reviewers, practice analysis task force members and so many more. I'm grateful to my colleagues on the Board for their tireless work to ensure ABPM continues to uphold the highest standards in Preventive Medicine.

All the best,

Wendy E. Braund, MD, MPH, MEd, FACPM
Chair, American Board of Preventive Medicine

OUR MISSION & PURPOSES

MISSION

The mission of the ABPM is to:

- Certify physicians practicing in a specialty and/or subspecialty of preventive medicine and to extend and support development of those Specialties and Subspecialties; and
- Extend, encourage, and enhance the study and the standards of practice, and advance the cause of preventive medicine and the ABPM.

PURPOSES

The purposes of the ABPM are as set forth in its Certificate of Incorporation, and include the following:

- Establish and maintain high standards in preventive medicine including the specialty and subspecialty areas of Aerospace Medicine, Occupational & Environmental Medicine, Public Health and General Preventive Medicine, Addiction Medicine, Clinical Informatics, Medical Toxicology and Undersea and Hyperbaric Medicine, and other related medical specialty areas;
- Develop and administer examinations and otherwise evaluate physicians applying for Certification and Continuing Certification in preventive medicine, its specialty and subspecialty areas and other related medical specialty areas;
- Grant and issue Certificates or other recognition of knowledge and skills in preventive medicine and its specialty and subspecialty areas and other related medical specialties and to suspend or revoke the same when appropriate; and
- Enhance, encourage and engage in programs and practices related to the improvement of diversity, equity, and inclusion of all ABPM Diplomates.

2022 HIGHLIGHTS

For the latest news from ABPM, check the ABPM website at www.theabpm.org and follow us on [LinkedIn](#).

Clinical Informatics Practice Pathway Extended for Three Years

In March 2022, ABPM announced that the American Board of Medical Specialties (ABMS) approved its request for a three-year extension of the practice pathway for Clinical Informatics. This extension recognizes the negative impact of the COVID pandemic on physicians' ability to meet eligibility requirements. It also allows physicians with substantial experience in the practice of Clinical Informatics, who have not completed an ACGME-accredited fellowship in Clinical Informatics, to apply for the Clinical Informatics certification exam for an additional three years, through the 2025 exam cycle.

ACGME Approves Separate Designations of Three Preventive Medicine Specialties

In June, ABPM was pleased to announce that the Board of Directors of the Accreditation Council for Graduate Medical Education (ACGME) formally approved ABPM's request for separate designations for each of the three preventive medicine specialties: Aerospace Medicine, Occupational & Environmental Medicine, and Public Health & General Preventive Medicine.

As a result of this update, the specialties will be listed separately on the ACGME's website, the Association of American Medical Colleges (AAMC) Residency Explorer tool and its Electronic Residency Application Service (ERAS), and the American Medical Association's Fellowship and Residency Electronic Interactive Database (FRIEDA) - greatly increasing awareness of ABPM's specialties among medical

school students and physicians searching for career paths in preventive medicine.

ABPM Reaffirms its Policy of Accommodation for Residents and Fellows Affected by the COVID-19 Outbreak

ABPM reaffirmed its Policy of Accommodation for Residents and Fellows affected by the COVID-19 outbreak in February 2022. The policy was originally enacted in April of 2020.

The Board is now extending the 2020 policy in response to the prolonged effects of the COVID-19 pandemic, the emergence of several variants since 2020, and the continued potential disruption to the availability of residency and fellowship rotations that physicians may continue to face.

Core Preventive Medicine Incorporated into Specialty Certification Exams

Beginning in 2022, the Core Preventive Medicine examination questions were incorporated into each of the three specialty certification exams - Aerospace Medicine, Occupational & Environmental Medicine, and Public Health and General Preventive Medicine. Previously, Examinees were required to take and pass two separate exams - the specialty certification exam and the Core Preventive Medicine exam. This change will eliminate the need to take a separate Core Preventive Medicine exam.

PREVENTIVE MEDICINE AWARENESS CAMPAIGN

Aerospace Medicine Lobby Efforts

Since 2021, ABPM has been supporting efforts to encourage the FAA to establish and enforce safety protocols for private and commercial spaceflight, including pre- and post-flight medical examinations performed by ABPM Diplomates certified in Aerospace Medicine.

To raise awareness of the specialty of Aerospace Medicine and solicit possible funding opportunities, ABPM staff created a white paper summarizing the issues facing private and commercial spaceflight and reached out to members of Congress responsible for NASA appropriations and FAA oversight. So far ABPM has received several positive responses and plans to expand those efforts by engaging directly with influential members of Congress.

Program Director Summits & Surveys

ABPM is making strides toward improving its programs and services and understanding the pipeline of residents and fellows who may apply for certification. Communication between ABPM and residency and fellowship programs is key to success in this endeavor.

Our communication plan includes a survey of program directors conducted following the application period each year; we conducted our second survey this year. Additionally, we are strengthening the connection between ABPM and training programs through the Program Director Summit, launched this year with three identical virtual live sessions held in February. We hope to continue these summits annually.

Social Media & Quarterly Newsletter

Do you follow ABPM on [LinkedIn](#)? ABPM launched its social media presence in 2020 with its LinkedIn page. Since then, we've grown to over 1,500 followers! We post

announcements and updates from ABPM and feature the accomplishments of our Diplomates.

In 2019, ABPM issued the first issue of its email newsletter. About 11,000 Diplomates and other stakeholders receive the newsletter (if you don't receive it, sign up [here](#)) and it has enjoyed a high level of engagement, with about 60% of recipients opening each issue.

Preventive Medicine: Lowest Burnout & Depression among Specialties

Amid increasing burnout and stress for physicians, especially during the pandemic, Preventive Medicine offers an attractive career option for new and mid-career physicians. Medscape's [*Physician Burnout & Depression Report 2023: I Cry but No One Cares*](#) found that, among those surveyed, Preventive Medicine physicians reported the lowest rates of burnout among all specialties in the United States, for the second year in a row.

Stakeholder Engagement Meetings

ABPM has held meetings with its partner specialty societies for several years, and recently these meetings have included productive discussions about the current priorities of both ABPM and specialty societies. For example, our most recent meetings have concentrated on how we can work together to develop the new CCP and support physician learning.

Conference Presentations & Exhibits

ABPM staff and board members are so glad to be back in-person to represent the ABPM at our partner societies' conferences. In 2022, the ABPM exhibited at the annual conferences of ACOEM, ACPM, AsMA/UHMS, and ASAM. We also presented at sessions on initial and continuing certification at several conferences and other meetings – we look forward to meeting more Diplomates in person next year!

Kevin Patrick (left) and Dr. Tim LaVan

TASK FORCE ADDRESSES DIVERSITY, EQUITY, AND INCLUSION

The DEI Task Force presented its initial recommendations for revisions and updates to the ABPM's organizational documents - the Policies and Procedure Manual, Bylaws, and Employee Handbook - to the Board of Directors at its Annual Meeting in January 2022. The Board approved all of the Task Force's recommendations.

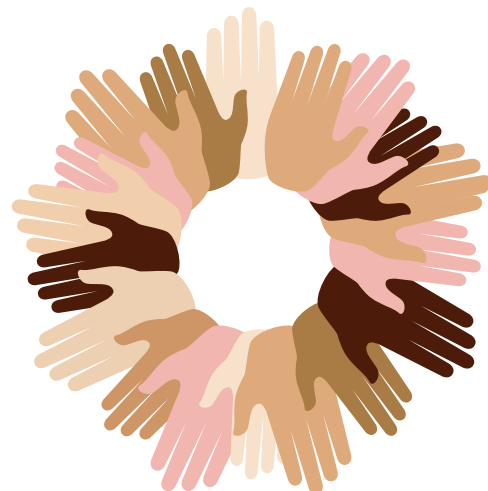

At its January 2022 meeting, the Board also expanded the Task Force's charge to investigate:

- Data collection from applicants and Diplomates;
- Processes to identify possible exam bias;
- DEI training for members of both the Board and Staff; and
- Opportunities to recruit a diverse candidate pool.

In August 2022, the DEI Task Force reported its recommendation to engage with a consulting firm to help ABPM work toward its DEI goals.

ABPM TRANSITIONS TO NEW THIRD-PARTY EXAM ADMINISTRATOR

- ✓ NBME notified ABPM that it will no longer support traditional certification exams.
- ✓ ABPM chose Professional Testing, Inc. (PTI) as its partner to administer the 2022 certification exams.
- ✓ June 2021: Transition agreement between NBME and PTI finalized to allow transfer of ABPM's item bank and statistics.
- ✓ March 2022: 8,581 exam items successfully transferred from NBME to PTI's item bank.
- ✓ October 2022: Exams administered at Pearson Vue centers.

ABPM TAKES STEPS TO REDUCE CARBON FOOTPRINT

Preventive Medicine specialists know that the health of people and the health of the planet are closely aligned.

ABPM has been making significant progress toward a greener office and organization. Here are just a few:

- Collecting and analyzing data to measure the impact of our operations on the environment, by completing EPA's Greenhouse Gas Emissions Calculator. We're excited to share our findings later this year and to measure our progress towards reducing our carbon footprint each year.
- Reducing our office's carbon footprint by reducing the physical size of our office, which we did when moved to a new space in December 2022. In addition, we are reducing our use of single-use plastic, both in the office and at meetings. For example, at board meetings, we provide water in pitchers instead of individual plastic bottles.
- ABPM staff are required to be in the office only two days a week, reducing their need for transportation. Our office's downtown Chicago location allows 100% of its employees to use public transportation to get to work.

We look forward to finding more ways we can reduce our environmental impact.

ABPM EMBARKS ON FIVE-YEAR STRATEGIC PLAN

In the past few years, the ABPM has started intentionally planning for its future. ABPM is continuing that practice by implementing five-year strategic plans, the most recent of which was approved by the Board of Directors in August 2021.

Over the course of 2022 and the next four years, the ABPM will concentrate its resources on five major lines of effort:

- Administer high-quality initial certification exams;
- Develop, launch, and maintain the new Continuing Certification Program (CCP);
- Enhance the visibility and awareness of Preventive Medicine specialties and subspecialties;
- Advocate for and promote the value of ABPM board certification; and
- Pursue excellence in organizational administration and governance.

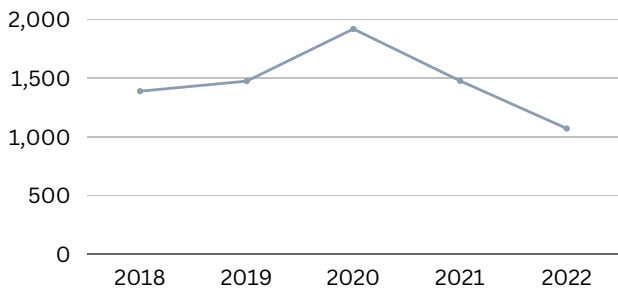

ABPM Reaches all Strategic Milestones for 2022

- ✓ Administer the initial certification exam with our new third-party exam administrator
- ✓ Launch Year 2 of the Clinical Informatics LAP Pilot
- ✓ Obtain ABMS approval of ABPM's expanded LAP Pilot
- ✓ Create LAP Subcommittees responsible for writing questions and overseeing the administration of the LAP for each ABPM specialty and subspecialty
- ✓ Launch campaign highlighting Diplomate accomplishments
- ✓ Obtain ABPM Board of Directors approval of annual budgets

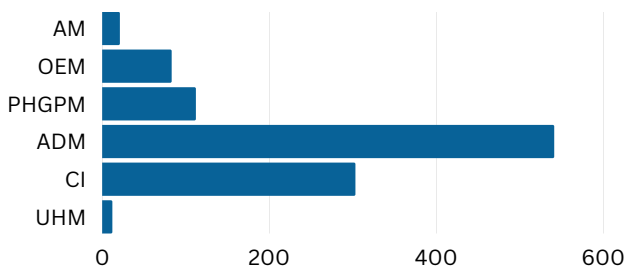

2022 APPLICATION CYCLE

In 2017, the first cohort of physicians submitted applications for the newly approved subspecialty of Addiction Medicine, boosting the total number of exam applications to over 2,400 that year. Since then, the number of applications has stabilized with some fluctuations, while remaining strong over the past five years.

Applications, 2018-2022

2022 applications by specialty/subspecialty

2022 Applicant Survey Results

ABPM conducted its first annual survey of applicants following the application and exam cycles. All applicants – both those who were approved for the exam and those who were not approved – were invited to respond to the survey. The survey collected feedback on ABPM application and exam processes. ABPM uses the feedback to improve its processes for future applicants.

In the 2022 survey, we learned that most applicants found the application instructions and platform easy to understand and were satisfied with the documentation submission process. There are some areas which ABPM aims to improve based on feedback: reducing the time it takes to notify applicants of their application's approval and clarifying practice pathway requirements.

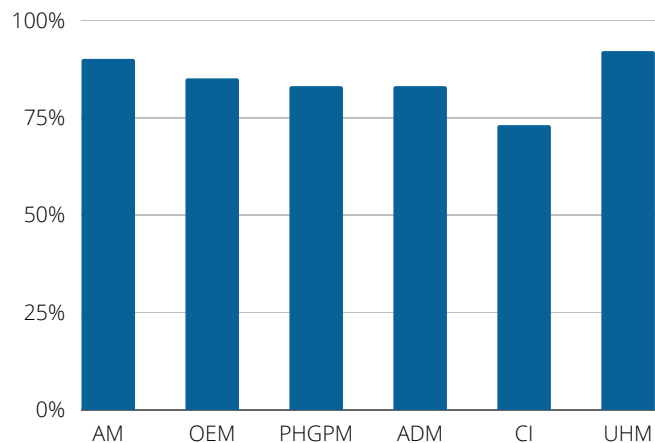

2022 CERTIFICATION EXAM

In 2022, ABPM administered the newly merged core and specialty exams, providing a more streamlined exam experience.

1,104 ABPM examinees took the initial certification exam:

- 21 Aerospace Medicine (AM)
- 84 Occupational & Environmental Medicine (OEM)
- 113 Public Health & General Preventive Medicine (PHGPM)
- 599 Addiction Medicine (ADM)
- 274 Clinical Informatics (CI)
- 13 Undersea & Hyperbaric Medicine (UHM)

Specialty & Subspecialty Initial Certification Exam Pass Rates

CONTINUING CERTIFICATION

Continuing Certification Program (CCP) Update

The first phase of ABPM's three-phase transition from the previous maintenance of certification (MOC) program to the new Continuing Certification Program (CCP) began on January 1, 2023.

The ABPM's CCP was developed in compliance with the new Standards for Continuing Certification mandated by the American Board of Medical Specialties and in response to feedback from ABPM Diplomates, who wanted a simpler and more meaningful program, and who overwhelmingly preferred an innovative alternative to the traditional high-stakes, point-in-time MOC exam.

To ensure a smooth transition to the CCP, ABPM is introducing the new program in three separate and distinct phases. Phase One of the transition will be in effect for calendar years 2023 and 2024.

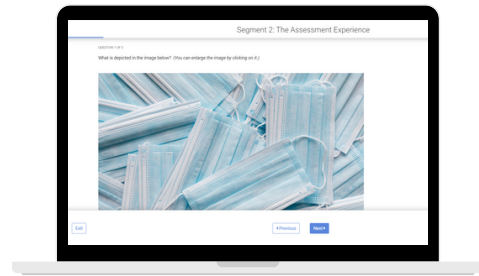

All Diplomates with time-limited certificates will begin participating in the CCP in 2023. There are just three simple requirements:

1. Maintain a current, valid, and unrestricted medical license in every US state, territory, or Canadian province in which you practice medicine;
2. Pay the annual fee using the ABPM's Physician Portal (more on the annual fee later in this issue);
3. Attest to earning 20 *AMA PRA Category 1 Credits™* (using the ABPM's Physician Portal), six of which are relevant to your ABPM certification(s). ABPM is empowering Diplomates to choose for themselves the CME courses that are relevant to their ABPM specialty – there is no specific list that you must choose from!

ABPM will share instructions with Diplomates to log into the online Physician Portal to pay the annual fee and attest to completing CME credits in the first quarter of 2023.

During Phase One of the transition, Clinical Informatics Diplomates will continue to participate in the Longitudinal Assessment Program (LAP) pilot through the pilot's currently scheduled conclusion of March 31, 2023.

[Learn more about the CCP on the ABPM website.](#)

Longitudinal Assessment Program (LAP) Pilot Update

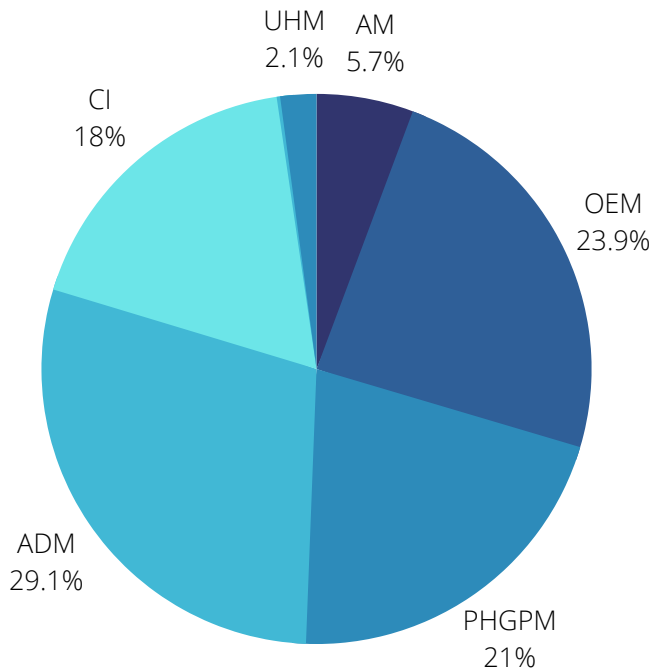

The ABPM's LAP Pilot began in April 2021 and concludes at the end of March 2023. Throughout the Pilot, we've gathered participants' feedback; we're taking their perspectives to heart as we prepare to extend the LAP pilot for all specialties and subspecialties in 2025.

Some lessons we've learned so far:

- The LAP should be easily accessible and administered without a time limit to reflect how ABPM Diplomates practice medicine;
- ABPM and specialty societies need to collaborate closely to provide educational resources related to the LAP; and
- A meaningful and effective LAP relies on high-quality questions that reflect the day-to-day practice of physicians.

DIPLOMATE STATISTICS

Current ABPM Certificates by Specialty/Subspecialty

As of January 2022, 51% of current ABPM certifications were in a specialty while 49% were in a subspecialty.

Certificates by Specialty/Subspecialty

as of January 1, 2022

Aerospace Medicine (AM).....	731
Occupational & Environmental Medicine (OEM)	3,068
Public Health & General Preventive Medicine (PHGPM).....	2,700
Addiction Medicine (ADM).....	3,731
Clinical Informatics (CI).....	2,313
Medical Toxicology (MT).....	26
Undersea & Hyperbaric Medicine (UHM).....	272

2022 PRESENTATIONS

- "American Board of Preventive Medicine Update" presented by ABPM's Executive Director, Christopher J. Ondrula, JD, at the Occupational & Environmental Medicine Residency Directors Association Meeting. (April 2022)
- "Board Certification in Occupational Medicine" presented by former Board of Directors member, Dr. Eric Wood, at the American Occupational Health Conference (AOHC). (May 2022)
- "ABMS Continuing Certification Standards Update & ABPM's Draft Continuing Certification Program Requirements" presented by Dr. Wendy E. Braund, Christopher J. Ondrula, and Senior Vice President of Certification Standards and Programs at ABMS, Dr. Greg Ogrinc, at Preventive Medicine 2022. (June 2022)
- "American Board of Preventive Medicine Update" presented by ABPM Chair, Dr. Wendy E. Braund at ACPM's Residency Directors' Workshop. (June 2022)
- "Becoming Certified" presented by ABPM's former Certification Manager, Diane Landahl, MSTD, CPCS, at the ASAM Board Review Course. (July 2022)

Christopher Ondrula, ABPM's Executive Director (2nd from left), talks with Board members Drs. Tim LaVan, Cheryl Lowry, and Joanna Nelms.

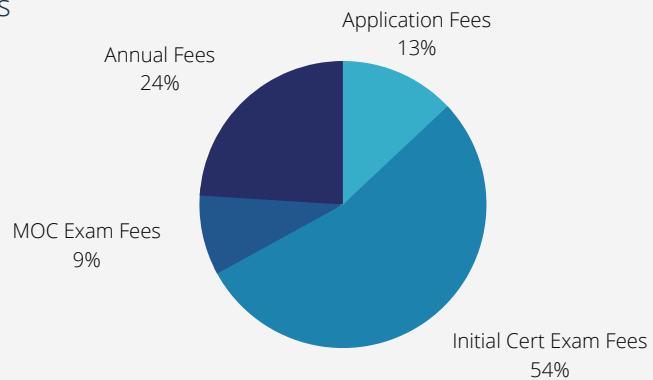

FINANCIAL STATUS

Find additional details on ABPM's financial status at www.guidestar.org where our required filing as a nonprofit organization (Form 990) is posted.

Income

In 2022 ABPM ranked:

- 15th of the 24 ABMS Member Boards as measured by total Diplomate population size*;
- 13th as measured by revenue, exclusive of investment income;**
- 13th as measured by total cash, savings, and investments.

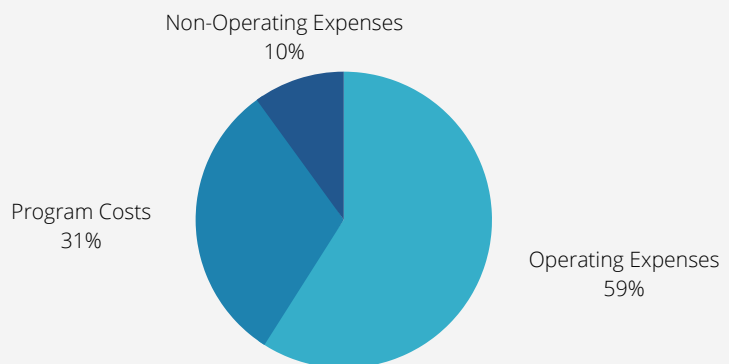

ABPM has established and continues to maintain a stable financial foundation to sustain its mission and goals.

Expenses

In 2022 ABPM ranked 22nd of the 24 ABMS Member Boards in terms of staff compensation as a percentage of revenue (excluding investment income).**

ABPM's prudent financial management allows it to prioritize improving and maintaining its programs for applicants, Examinees, and Diplomates.

For 2023, the ABPM's commitment is to continue to invest heavily in new programs for its Diplomates, specifically the expansion of the LAP pilot, a new application platform, and physician portal.

*According to the 2020-2021 ABMS Board Certification Report

**Per the most recent IRS Form 990 filed by each ABMS Member Board

VOLUNTEERS

Dr. Karen Studer and Dr. Jeffrey Hoffman

ABPM Welcomes New Director and Sub-Board Chair to its Board of Directors

ABPM was pleased to welcome two new members of its Board of Directors at the August 2022 meeting.

Karen R. Studer, MD, MBA, MPH, FACPM, represents Public Health and General Preventive Medicine on the Board. She is the Program Director for the Preventive Medicine Residency and an Assistant Professor at the Schools of Public Health and Medicine at Loma Linda University in California. She is also an attending physician at SAC Health, a Federally Qualified Health Center, where she began a women's lifestyle medicine clinic.

Jeffrey M. Hoffman, MD, FAMIA, serves as the Sub-Board Chair for Clinical Informatics. He is the Chief Medical Information Officer at Nationwide Children's Hospital in Columbus, Ohio, and a Clinical Professor of Pediatrics and Division Chief of Clinical Informatics at Ohio State University College of Medicine.

Drs. Studer and Hoffman were elected to their respective positions at the ABPM Board of Directors meeting in January 2022. They attended the August 2022 meeting as observers and began their terms immediately upon the conclusion of the meeting.

ABPM Recognizes Carolyn J. Murray, MD, MPH, and Adi Gundlapalli, MD, for their service to the Board

The Board and staff of ABPM offer their deep gratitude to Drs. Carolyn Murry and Adi Gundlapalli, whose terms are ended in August of 2022.

Dr. Murray has served on the Board as a representative of Public Health and General Preventive Medicine since August of 2013.

During her tenure, Dr. Murray has represented her specialty on the Board with grace and thoughtfulness and ensured that the perspectives of practicing physicians, residents, and patients were always considered in Board discussions.

Dr. Gundlapalli first came on as our interim Clinical Informatics Sub-Board Chair in 2018 and went on to be selected as the Sub-Board Chair in 2019. During his tenure, Dr. Gundlapalli oversaw ABPM's first foray into longitudinal assessment with the Clinical Informatics Longitudinal Assessment Program (LAP) Pilot.

Dr. Carolyn Murray with ABPM Executive Director Christopher Ondrula

ABPM BOARD OF DIRECTORS QUALIFICATIONS

ABPM will issue a call for nominations this summer for two positions on the Board: one representing Occupational & Environmental Medicine and the other representing Public Health & General Preventive Medicine. Let us know if you or a colleague meet the criteria to be a great Board member.

Occupational & Environmental Medicine Director

Directors representing Occupational & Environmental Medicine must:

- Hold a valid and unrestricted license to practice medicine in the United States or Canada;
- Hold valid and current certification in Occupational & Environmental Medicine;
- Actively practice Occupational & Environmental Medicine; and
- Otherwise be found qualified by the Board.

Public Health & General Preventive Medicine Director

Directors representing Public Health & General Preventive Medicine must:

- Hold a valid and unrestricted license to practice medicine in the United States or Canada;
- Hold valid and current certification in Public Health & General Preventive Medicine;
- Actively practice Public Health & General Preventive Medicine; and
- Otherwise be found qualified by the Board.

THANK YOU TO OUR VOLUNTEERS!

Want to get involved?

ABPM Diplomates lend their experience and knowledge to develop high-quality exams and to create effective certification programs. We are always looking for Diplomates to write questions for both the initial certification exam and for the new longitudinal assessment program (LAP). **If you are interested in contributing to our exams and assessments, contact us at abpm@theabpm.org.**
